

INSIDE YOUR SOUND®

Upgrade your old intercom with a RETRO Music Distribution and Intercom System from Intrasonic Technology

Quick and Easy Transformation

Intrasonic Technology – Your premier source for home music distribution and intercom systems

Intrasonic Technology (IST) music distribution and intercom systems enrich your residential media experience by broadcasting music to any room in your home – from iPods and other MP3 players, CD players, computers, or AM/FM/satellite radio – and enabling room-to-room conversations.

IST products are designed to be full-featured yet easy to use, and are priced to fit into your budget. And the wall-mounted units are available in a variety of styles and colors that seamlessly integrate into your existing home décor. The systems can also be integrated with home security technology.

Intrasonic Technology's products enable homeowners to:

- **Broadcast music** throughout your home from a variety of media sources
- **Carry on conversations** with family and friends in any room in your home
- **Customize your experience** by listening to different music sources in each room

Whether you want to replace an existing intercom system or install a new state-of-the-art communications and entertainment system, Intrasonic Technology has a feature-rich, cost-effective solution for you.

An attractive alternative

For too long, homeowners have had limited choices regarding their outdated, single-function antique intercoms – either have them removed and face costly wall patches and repairs, or put up with the unsightly units that simply no longer work. Now Intrasonic Technology's **RETRO Music Distribution and Intercom System** provides an exciting alternative! The RETRO is designed to update pre-existing in-wall home intercom systems – using your existing 3, 4, or 6 wire systems – for a quick and easy transformation to a state-of-the-art multi-source music distribution system.

The RETRO system offers a modern design that complements any décor, and delivers more features and flexibility than traditional intercom systems. Whether you select the RETRO for multi-source music distribution, room-to-room conversations, or home technology integration capabilities, your RETRO will deliver easy-to-use, state-of-the-art functionality at an affordable price.

Music distribution

Enjoy your favorite traditional or digital music throughout your home with the RETRO's music distribution features:

- Choice of 2 music source options in every room, enabling different music sources to be played in different rooms
- Built-in AM/FM radio with 10 preset options
- Portable Music Player (PMP) Bay to plug-and-play a wide variety of MP3 devices such as iPods, Zunes or hand-held satellite radios – either from downloaded or streamed music
- USB or Firewire connection to charge MP3 devices as they play
- Suspension of music broadcast when an intercom call is made that automatically resumes to all stations other than those engaged in the call once the call is answered

Intercom communications

Stay in touch with every room in your home from any other location with the RETRO's room-to-room conversation features:

- Automatic Selective Call technology that broadcasts voice calls throughout the home, but only broadcasts between the initial call station and the responding station once the call is answered
- Hands-free communication for the party receiving the call
- Capability to audibly monitor single or multiple zones
- Privacy function that disables another station from listening to or monitoring the room
- Hands-free operation at Master Station with IREMOTE control (available as an option)
- 13 zone capacity to cover every major room in your home

Flexible installation options

Update your home's décor along with its intercom system with the RETRO's customizable installation options:

- Room adaptor and trim plates that allow installation of new stations into existing intercom wall openings without requiring drywall repair, even if the fit is not exact
- Wall units that can be painted to seamlessly integrate into your walls
- Connection to ceiling or in-wall speakers from all stations on the system
- Door communications with optional door release features

Functionality Meets Flexibility

The **RETRO Music Distribution and Intercom System** is a complete component-based system with the flexibility to meet your specific needs. Choose a combination of up to 13 of the following RETRO components to build your completely customized music distribution and intercom system:

- **RETRO-M Master Station:** Main interface that controls the music and intercom functions and volume levels, bass and treble levels, clock settings, and more. The Portable Music Player (PMP) Bay is integrated into the Master Station and can be heard from any Room or Patio Station.
- **RETRO-5R Room Station:** In-wall intercoms in rooms throughout the home that enable selection between intercom, radio, and portable music sources. Also includes communications with other stations, including the Master and Door stations. Ceiling or in-wall speakers can be added to each Room Station.
- **RETRO-5P Patio Station:** Weather-resistant station with Room Station functionality, designed for outdoor installation in protected areas such as a patio or porch. Outdoor cube or rock speakers can be added.
- **RETRO-D Door Station:** Weather-resistant station designed for outdoor installation in protected areas. Enables communication with other stations for verification of guest identity before opening the door, with optional door or gate release. Also includes a selection of door chimes.
- **RETRO Room Adaptor and Trim Plates:** Optional hardware designed to fully cover existing intercom wall openings, eliminating the need for drywall repair. Covers holes for vertical or horizontal stations, including stations up to 8" large.

Intrasonic Technology also offers the ease and convenience of component bundles that offer the most popular options in a single package, saving you time choosing your music distribution system:

- **RETRO-MVPAC:** Includes all components of a typical system in one package, for existing systems with vertically-oriented wall stations. Includes a Master Station, 5 Room Stations, 1 Patio Station, 1 Door Station, and 6 RETRO-5RV vertical trim plates.
- **RETRO-MHPAC:** Includes all components of a typical system in one package, for existing systems with horizontally-oriented wall stations. Includes a Master Station, 5 Room Stations, 1 Patio Station, 1 Door Station, and 6 RETRO-5RH horizontal trim plates.

Accessories and Enhancements

Intrasonic also offers accessories to help you get even more from your music distribution systems. Be sure to ask your dealer to provide you with the following accessories:

- **Bluetooth Receiver:** Multi-use adapter that Bluetooth-enables any music device with a 3.5mm jack! Stream from your iPhone to the RETRO system to play your favorite music throughout your living space, while keeping your phone close at hand. Plug it into your stereo or home theater system to enjoy digital music thorough your stereo or surround-sound speakers. The options are limitless! Comes with USB or household power cords.
- **ACABLE:** 18" cable with a 3.5mm plug to connect Personal Music Players to your RETRO-M Master Station.
- **IREMOTE:** Full-function handheld remote control for your RETRO-M Master Station.
- **RETRO-VC Volume Control:** Indoor amplified volume control with two-source option, typically used in rooms with no need for a Room Station.

Are you ready to upgrade your existing intercom system for leading-edge music and intercom functionality?
