**DESCRIPTION**

Meridian's US8GT8POEH is an unmanaged, 8-port PoE Ethernet switch with P.S.E. function. The US8GT8POEH supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. The switch has eight 10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. Its rugged IP-40 housing design and wide operating temperature range (-40 to +85°C) enables it to operate in even the extreme environments. Therefore, the switch is one of the most reliable choices for PoE Ethernet applications.

**TYPICAL OPERATION**

As illustrated on the drawing (Figure 1), the US8GT8POEH can be used to connect a number of PoE Ethernet devices (e.g., IP-Cameras, access panels, or other Ethernet devices requiring remote power. This switch also offers redundant power inputs for increased system reliability.
