MESH™ EPX - No Phone Line Telephone Entry Systems

MESH EPX marks the latest generation of Enterphone No Phone Line telephone entry intercom systems. EPX can be used as a basic Enterphone system when combined with any Viscount telephone entry panel (MESH, Elektra, Axess, Classic, Slimline, Centurion). EPX can also be used with MESH as a complete building security system including intercom, access control and video functions. To accommodate new cellular, VOIP and voice over cable technologies EPX can be programmed to dial either suite relays using existing building wiring or telephone numbers for each user.

Functional and Technical Features:

- Suite selectable dialing by relay or telephone number
- Built-in Intercom Call Waiting
- Distinctive ring for intercom calls
- Does not require users to have regular phone service. A telephone connected to any telephone jack with/without phone service can receive intercom calls.
- Does not require rental of a telephone line by management and there are no message unit charges
- Integrated DSL filter
- Up to 240 suites per base housing, expandable to 2000
- Simple 2 wire data cable connection between any panel and EPX
- Accepts any DTMF telephone based input
- Backward compatibility with Enterphone 2000 relays
- Up to 16 panels or guardstations per system
- Multiple building calling
- Optional security functions based on panel selected including PIN numbers, Card readers, CCTV cameras and more
