

Free-standing 360° or 180° view and wall mounted TW beam towers

The TW, STW and STWM towers are suited for all OPTEX® AX and Smart Line™ (SL) wired, IP and wireless infrared beams models

Concealing active infrared beams in towers increases the security and flexibility of perimeter protection systems.

OPTEX Dual and Quad IR beams can be mounted directly on walls or poles, however by installing them in towers, it makes them less obvious. The number and height of the fitted beams becomes unknown to the potential intruders, enhancing this way the security level.

Additionally, the options to mount lighting or a fixed camera in a special housing on top of the towers allows a complete security system to blend nicely into its environment.

- Free standing models TW provide 360° unobstructed view for the beams, enabling back to back installation to cover a whole perimeter
- Free-standing STW models provides 180° view enabling side detection for sites where wall mount is not a possible or practical option
- Wall mounted STWM models features 180° view and flush mount
- 0.5m/1m/1.5m/2m/3m heights available
- Durable construction with extruded aluminium frame and acrylic materials
- Beams can be mounted at any height and direction in the tower
- Additional housing and fixings for lighting or fixed cameras available as options
- Anti-tamper and full fixing kit for the tower itself supplied
- Suitable for all wired, IP and wireless OPTEX AX and Smart Line (SL) models (consult us for the list of accessories needed)

Tower part numbers

Beam tower cover	TW 360° free-standing towers		STW 180° free-standing towers		STWM 180° wall-mounting towers

TW300	3m 360° Beam Tower Floor (lateral supports incl.)	STW300	3m 180° Beam Tower Floor	STW300M	3m 180° Wall Mount Beam Tower

Fixing kit for the OPTEX beam set

Two models of beam support plates are available, and the selection will depend on the OPTEX beam models to be installed. Each kit mentioned below includes two plates, one for the transmitter and one the receiver.

TWSAX

TWSAX is a kit of two plates, designed to mount the OPTEX AX-TN/TF beam models. Only one TWSAX kit is necessary per beam set.

TWSSL

TWSSL is a kit of two plates, designed to mount the OPTEX Smart Line (SL) and the AX-TFR beam models. Only one TWSSL kit is necessary per beam set.

For wireless beams, an additional battery holder would be needed, please contact us for more information or consult our beam tower guide on our website.

Common accessories

	TWE Tower head extension for lighting (lighting bulb not included)		TWEB Concrete floor bracket for the double sided free standing beam towers		TWH 24V 12V or 24V, 250mA, non polarity heater		TW FAN 12V/24V 12V, 100mA fan (TW Fan 12V) 24V, 150mA fan (TW Fan 24V)
	TWAA Anti-climb tamper		STWEB Concrete floor bracket for the STW single sided free standing beam towers		TWT Thermostat for heater		TWT-50 Thermostat for fan (for high temperature)
