K200 Series

Flexible solution for cabinet and drawer **access control**

Hardwired power
Hardwired data

The HES K200 cabinet lock makes it easy and cost effective to bring access control to cabinets and drawers where audit trail and monitoring are becoming increasingly critical. The K200 uses Wiegand communication between the integrated, multi-technology reader and an access control system to deliver full access control to cabinets and drawers.

It installs easily, enabling real-time audit capabilities and door monitoring at the drawer or cabinet level. The K200 offers a convenient, single credential solution for compliance and safety throughout your facility.
