

Put the power of a computer in your code cutting with the CodeMax[®] Machine. Based on the industry standard Blitz[™] Machine, the CodeMax[®], introduced more than 25 years ago, **is the original computerized code machine**. The CodeMax[®] has an internal computer chip that contains **Depth & Space Data (DSD) for more than 950 different**

lock types, plus a micrometer function in both inch and metric formats. This allows it to cut virtually all standard vehicle, commercial, residential and furniture keys throughout the world. All models of the CodeMax[®] are equipped with a shoulder gauge safety switch. This feature ensures the shoulder gauge is out of the way before you start cutting a key.

On the Automatic Angler model (No. 1200MAXAA), the cutter pivots automatically to cut high security angle keys, such as Medeco[®]. Simply enter the depth and direction of the angle and the CodeMax[®] AA does the rest.

The total power of the CodeMax[®] is realized when you connect it to your PC. All machines come with a 25-foot (7.5m) 9-pin serial cable for easy connection to your computer. With HPC Software, the CodeMax[®] Machine becomes **an integral part of your computer system**.

Some of the benefits you will realize are:

- **With CodeSource[®] code retrieval software, creating an original key is as simple as looking up the code on your computer and downloading it to your CodeMax[®].**
- **Downloading master key systems from MasterKing[®], insuring error-free key cutting.**
- **The ability to interrupt that master key job to cut another code key, and easily return to the master key system.**
- **Automatically keep track of new keys created when using KeyTrail[®] key management software. Please refer to the Software Section for complete information on all of our programs.**

With optional equipment CodeMax[®] can cut:

- Assa V10/Twin[®]
- Emhart[®] Interlocking Pin
- Medeco[®] Biaxial[®], Commercial[®], KeyMark[®] and M³ Freedom
- Schlage Primus[®]
- Flat Steel Safe Deposit Keys and others

CodeMax[®] is a sound investment in your business and it will quickly become a vital part of your lock shop.
