

Pick Guns

Electropick™

The Electric Pick Gun is another innovation of HPC. The **Electropick™** is the **original electric pick gun**, and is still the best! The amount of "bounce" in the pick blade is **adjustable, allowing you to modify the action for different locks**. It comes complete with 2 straight pick blades, 2 angled pick blades, 1 medium tension wrench, 1 rigid tension wrench and an AC charger. The chargers are **available in 120VAC and 240VAC**, and with plugs suitable for USA and Canada, as well as Europe, the United Kingdom, Australia and New Zealand. In addition, an optional 12VDC charger with a cigarette lighter plug is available.

Electropick™ No. EPG-1

Comes complete with:
(2) No. P-2 straight pick blades
(2) No. P-3 angled pick blades
(1) Medium Tension Wrench
(1) Rigid Tension Wrench
(1) AC Charger (120V or 240V)

•• **No. EPG-1E** for Europe

— **No. EPG-1UK** for United Kingdom

— **No. EPG-1AU** for Australia, New Zealand

No. EPGC-12A
Optional 12VDC Charger

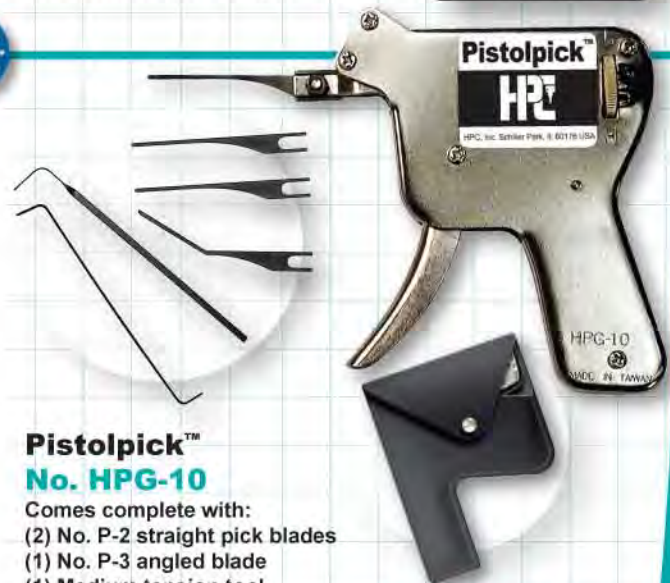

PICKS

Pistolpick™

HPC's **Pistolpick™** is designed to easily rake open pin and disc tumbler locks. **Rapid squeezing of the trigger bounces the pick needle, raising the pins or discs to the shear line.** All you add is proper tension, and the lock is open. All parts, including the main housing, are made from **nickel-plated cold rolled steel** for protection against rust and to provide an attractive, **high quality pistol-style finish**. The Pistolpick™ comes with 3 pick blades and 2 tension wrenches. An optional leather holster case is available (No. HPG-CASE).

Pistolpick™ No. HPG-10

Comes complete with:
(2) No. P-2 straight pick blades
(1) No. P-3 angled blade
(1) Medium tension tool
(1) Rigid tension tool

No. HPG-CASE
Optional Case

Replacement Blades

Stainless steel provides greater strength and flexibility, in a thinner profile. These blades are perfect for locks with particularly narrow keyways and for anytime you want extra performance.
