

Aimetis E4000 Series™ Physical Security Appliance (PSA) combines purpose-built small form factor hardware with Aimetis Symphony™ video management and analytics software, creating a high performance intelligent video surveillance platform for installations up to 32 cameras. The E4000 series is an ideal solution for space constrained environments such as small footprint retailers, gas stations, and harsh environments.

The onboard Intel® Celeron® processor provides unsurpassed performance with very low heat generation and minimal cooling requirements, resulting in improved stability and longevity. A tough aluminum case with heat dispersing fins draws heat away from the processor and enables the system to operate in environments not suitable for commercial off-the-shelf PCs. To provide installation flexibility, the E4000 can be wall or rack mounted.
