

**ROLLAND**  
CENTURIES OF SECURITY

# Utility Chests

Daily cash management for any business environment where accumulating cash in the cash register is at risk for armed robbery or internal theft.

## Bolt Detent –

Bolts retract when the safe is opened, preventing bolt damage when closing door

## Auto Lock Feature –

Safe automatically locks when door closes

## Relocker –

Emergency bolts fire when safe detects an attack

## Heavy Duty Construction –

Solid plate steel construction with a ½” solid plate steel door

**Standard Locking Devices –** U.L. listed Group II combination locks and key-locks protected by a drill resistant hard plate

**Anchor Holes –** Each safe has at least two built-in anchor holes to bolt the safe to the floor
