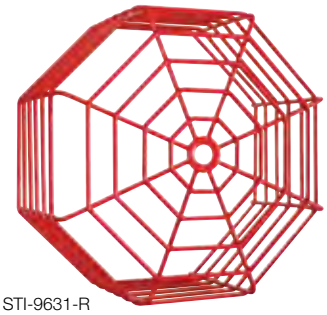
STI CLOCK/BELL DAMAGE STOPPER®

STI-9632



STI-9631-R

PRODUCT OVERVIEW

These super tough wire guards are designed to protect clocks, bells and similar instruments. Three sizes are available to cover a wide range of units. Each is constructed of 9-gauge steel wire with corrosion resistant polyester coating. Their octagon, spiderweb like shape also helps them take tough knocks in stride.

BACKED BY A THREE YEAR GUARANTEE

As all STI protective wire guards, these Stoppers are backed by a three year guarantee against breakage in normal use. Also, because they are white in color, users report that their clock numbers are easier to see than with darker competitive guards. Installation is easy and tamper resistant hardware (screws and bits) are available.

KEY FEATURES

General Information

- Guards help protect against vandalism and accidental damage.
- Three year guarantee against breakage in normal use.

Construction

- Weblike octagon shape of 9-gauge coated steel wire makes them extremely difficult to break.

Installation

- Fast and easy installation.
- Simple removal for servicing or routine maintenance.
- May be painted prior to installation to match decor.

Options

- Tamper resistant hardware (screws and bits) are available.
- Three models to fit a wide range of units (both clocks and bells).
