

CO1224 Carbon Monoxide Detector

System Sensor's CO1224 provides early warning when its electrochemical sensing technology accurately measures carbon monoxide levels in the air.

Carbon monoxide is an odorless, colorless, tasteless and highly toxic gas that is produced when fuels, such as wood, gasoline, charcoal and oil, are burned with insufficient air. The majority of residential and commercial fatalities caused from these fuels come from heating systems, power tools and charcoal grills.

If carbon monoxide is detected, the CO1224 will alert residents by sounding and flashing a temp-4 signal alarm. Protection is guaranteed 24/7 by a central station, regardless of whether residents are away from home, sleeping or already suffering from the effects of CO.

The CO1224 is specifically designed for system operation. This means the detector is fully listed to UL 2075, offering a code required trouble relay, which sends a sensor failure or end-of-life signal to the control panel and the central station, as well as SEMS-type terminal Philips-head screws, which provide a quicker and more positive wiring connection and code required wiring supervision. Also, the CO1224 offers a low current draw, allowing more detectors to be connected to the panel without having to purchase a more expensive panel or an extra power supply.

Because the CO1224 is a 12/24 VDC detector, it will operate on most industry security or fire alarm control panels.

Features

- Full compliance with UL 2075
- A code required trouble relay
- Wiring supervision with SEMS terminals
- A six-year end-of-life timer
- 12/24 VDC
- A current draw of 20mA in standby and 40mA in alarm
- Versatile mounting for wall and ceiling
- Electrochemical sensing technology

Specifications

Architectural/Engineering Specifications

Carbon monoxide detector shall be a System Sensor model number CO1224, listed to Underwriters Laboratories UL 2075 for Gas and Vapor Detectors and Sensors. The detector shall be equipped with a sounder and a trouble relay. The detector's base shall be able to mount to a single-gang electrical box or direct (surface) mount to the wall or ceiling. Wiring connections shall be made by means of SEMS screws. The detector shall provide dual color LED indication, which blinks to indicate normal standby, alarm, or end-of-life. When the sensor supervision is in a trouble condition, the detector shall send a trouble signal to the panel. When the detector gives a trouble or end-of-life signal, the detector shall be replaced.

Electrical Specifications				
Operating Voltage	12/24 VDC			
Audible Signal	85 dB in alarm			
Standby Current	20 mA			
Alarm Current	40 mA (75 mA test)			
Alarm Contact Ratings	0.5 A @ 30 VDC			
Trouble Contact Ratings	0.5 A @ 30 VDC			
Physical Specifications				
Size	Length: 5.1", Width: 3.3", Height: 1.3"			
Approximate Weight	7 oz			
Operating Temperature Range	0° – 40° C (32° – 104° F)			
Operating Humidity Range	22 – 90% RH			
Input Terminals	14 – 22 AWG			
Mounting	Single-gang back box; surface mount to wall or ceiling			

Operation Modes

peration lode	Green LED	Red LED	Sounder	Hush Feature:	Pushing the Test/Hush button will silence th sounder for 5 minutes.
Normal (standby)	Blink 1 per minute	_	_	Trouble Feature:	When the detector is in a trouble condition, will send a trouble signal to the panel.
Alarm	_	Blink in temp 4 pattern	Sound in temp 4 pattern	End-of-life Timer:	After the sensor inside the detector has reac the end of its useful life, a trouble signal will sent to the panel. This will indicate that it is t
					to replace the detector. An electrochemical carbon monoxide detector lifespan is approximately six years, and the detector mu
