

NETSCOUT Handheld Network Test Solutions

The growth of digital transformation is driving a huge increase of IoT (Internet of Things) devices requiring IP connectivity and even network-delivered power. Visibility into the connectivity and communication between IoT devices and infrastructures is crucial to IoT success. Unfortunately, using tools not built to address the unique requirements of IoT installation and the network services they rely upon results in an environment of finger pointing and project delays.

The powerful combination of LinkRunner™ G2 and AirCheck™ G2 allows network professionals to quickly and easily validate connectivity, performance and measure key health indicators, such as PoE power, and RF signal-to-noise ratio, for wired and wireless networks. Regardless of skill level, these purpose-built network testing tools are the necessary solution for organizations faced with the challenge of supporting IoT devices.

LinkRunner G2

Purpose-built network tester streamlines workflows by combining the essential aspects of network connectivity testing for both copper and fiber in a single, ruggedized unit.

- 10/100/1000BASE-T RJ-45 port;
100/1000BASE-X Fiber SFP port
- Cable validation and distance-to-fault
- Validate PoE performance with TruePower™
PoE/UPOE load testing across all 4 pairs
- Android™-OS¹ extends capability across user workflow eliminating the need to carry multiple devices
- Automated test result upload to Link-Live simplifies project management

AirCheck G2

Dedicated handheld wireless tester that allows users to quickly verify and troubleshoot 802.11 a/b/g/n/ac network availability, connectivity, performance and rogue detection.

- 3x3 antenna for 802.11a/b/g/n/ac Wi-Fi connectivity and signal & noise visibility
- One-button AutoTest with pass/fail indication of the wireless environment
- Automatic discovery of SSIDs, Access Points, channel utilization, clients and interferers
- Rogue device detection and location
- Automated test result upload to Link-Live simplifies project management
