

Spectro-Link® Horizontal and Vertical Tees

APPLICATION

Horizontal Tees are used to branch off the duct and extend the fiber route in various directions. Vertical Tees can be used to change duct elevation. Vertical Tees may also provide an inline drop-off point for large numbers of cables routed to fiber distribution frames or other high volume equipment.

FEATURES

- Available in five sizes
 - 2" x 2"
 - 2" x 4"
 - 4" x 4"
 - 4" x 8"
 - 4" x 12"
- Available with or without covers
- Vertical Tee can be used as a drop off point along the duct system
- Retrofit Vertical Tees are used to add fiber to existing duct systems

STANDARDS COMPLIANCE

UL94 V-0 Rated

Meets NEBS GR-63-CORE*

PHYSICAL SPECIFICATIONS

Color: Yellow (Other color options available upon special request which may alter price, delivery time, and certification status)

Material: Noryl Plastic

Dimensions: See page two

DESIGN CONSIDERATIONS

- Manufactured of a fire retardant plastic that is halogen free.
- May be utilized to store and route copper cable in an indoor environment. It is recommended that fiber and copper be stored in separate systems.
- Use with Spectro-Link Joiners or Slotless Joiners to connect to ducting and other components.
- The 4" x 12" component does not contain end slots and should be used in conjunction with the Slotless Joiner.
- **Horizontal Tees:**
 - Provides a tee intersection that changes the direction of the duct route.
- **Vertical Tees:**
 - Redirects fiber while maintaining proper bend radius control
 - Provides a path for ongoing fiber while offering strain relief for fiber exiting down the vertical section
 - Retrofit Vertical Tees can be used to add a drop off point in duct systems where fiber has already been laid

WARRANTY INFORMATION

For a copy of Leviton product warranties, log on to www.levitonvoicedata.com/warranty.

TYPICAL SPECIFICATION

Horizontal Tees shall be used to branch off the duct and extend the fiber route in various directions. Vertical Tees shall be used to change duct elevation and/or provide an inline drop-off point for cables routed to fiber distribution frames or other high volume equipment. Horizontal and Vertical Tees shall protect fiber and help maintain proper bend radius. Components shall be UL rated and manufactured of fire retardant materials. Retrofit covers shall be available.
