

“GREEN” Power-Saving Surge Protectors

Not only saves your electronics, but also saves you energy & money!

All 4 models provide guaranteed protection (for life) from surges and spikes. The P4GC and P6GC also offer an **LCD Timer** that can be used to turn power off and on again to help you reduce energy use. The P7GB and P8GT provide APC's **Master/Controlled outlet feature** which saves energy by detecting when your computer is asleep and then automatically turning off power to your connected peripherals. Why use an ordinary surge protector when you can use one that pays for itself? **SAVE ON AVERAGE UP TO \$30 per year!! (varies by model)**

Product Features

- **Guaranteed protection & lifetime warranty** mean peace of mind
- **Saves energy, saves money**
- **Easy-to-program LCD Timer** automatically turns outlets on and off (P4GC, P6GC)
- **Master/Controlled outlets** automatically turns off power to idle equipment (P7GB, P8GT)
- **Wiring Fault LED** proactively notifies you of potentially dangerous building wiring conditions
- **Working Protection LED** proactively notifies you when the unit needs a free replacement

Protection

Multi-Stage Surge Protection Capacitors, inductors and Metal Oxide Varistors (MOVs) work together to ensure protection that is guaranteed for life. All three electrical modes (L-N, L-G, N-G) are protected. Reliable thermal fusing help ensure safe operation under all conditions.

Noise Filtering Electromagnetic interference (EMI) is reduced to help ensure good picture and sound quality.

Safety-Agency Approved Ensures the product has been tested and approved to work safely with the connected service provider equipment and within the specified environment. UL, FCC approvals. Listed to UL1449 standard.

Manageability

LCD Timer (P4GC/P6GC) – Easy to use, battery-powered timer enables you to program up to 6 different on/off settings.

Master/Controlled Outlets (P7GB/P8GT) – Compatible with desktops, laptops and netbooks; Detects when computer is off or in standby and then turns off power to connected peripherals.

LED Status Indicators Quickly understand unit and power status with visual indicators
