

“Fits Like a Glove”

NetShelter SX Guaranteed Compatibility

Schneider Electric guarantees that all 19" EIA-310-D compliant equipment will physically fit into a properly selected NetShelter SX cabinet with the mounting provided by the original equipment manufacturer (OEM), Schneider Electric, a third party vendor, or any combination thereof or your money back*. In some cases, OEM's provide proprietary mounting methods that do not comply with the EIA-310 standard. Schneider Electric performs continuous research and testing to identify additional mounting hardware required to properly install these non-compliant rack-mount devices in a NetShelter SX cabinet. The user may need to purchase additional mounting hardware to complete the installation.
