NOTES:

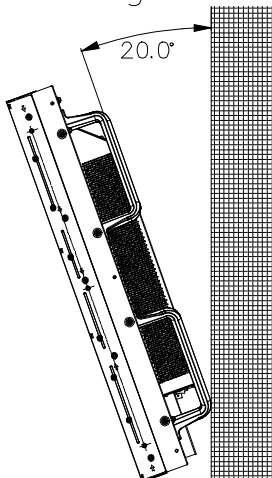

- This document is intended to be used as a reference guide to supply useful information for a design or installation. It is not intended to be a step-by step procedure for installation.
- Any ceilings or walls must be strong enough to support the monitor and the installation must be in accordance with any local building codes. All mounts should make secure contact to wood studs.
- 4:3 sources can be displayed on the 16:9 screen in either normal aspect ratio with bars on the left or right, or stretched horizontally to fill the screen using the menus (see "Aspect Modes" in menus and user manual).
- Distances are in inches, for millimeters multiply by 25.4.
- Distances may vary $\pm 5\%$.

Tilt Angle and Rotation

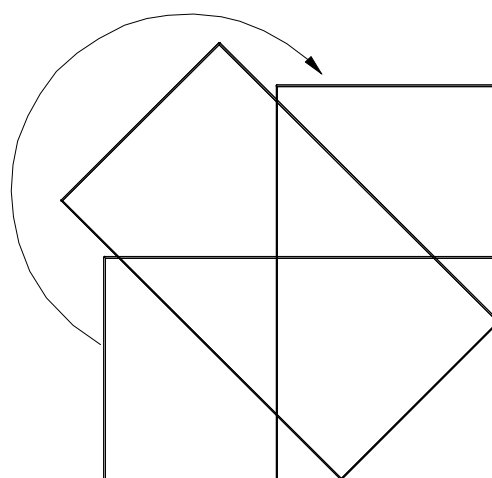

Below are the maximum angles that the monitor can be tilted in the landscape position only.

Landscape 20deg

Max Tilt Angle

Clockwise Rotation Only

Ventilation Recommendations (all models)

Dimensions below are minimum required for proper ventilation.

Ventilation Requirements:

Landscape: 5° to 40° C

Portrait: 5° to 40° C
(41° to 104° F)

NOTE:

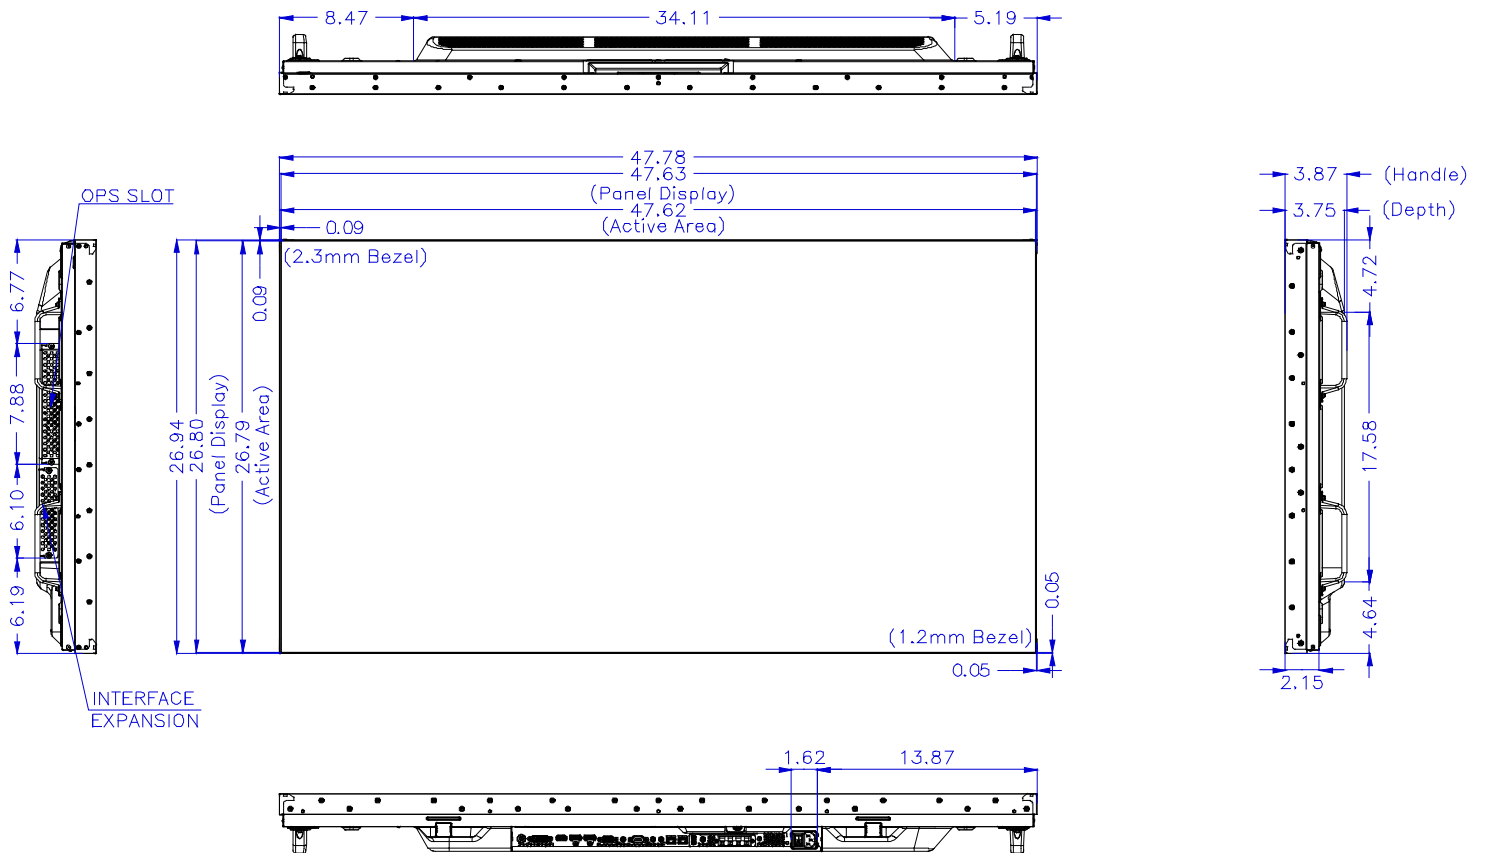

- The ventilation space should not be covered or closed off at the front of the opening. If for some reason the opening needs to be covered, other means of ventilation will need to be incorporated into the design. Contact NEC for design review and recommendations.

NOTE: Contact your NEC rep for codes not listed.

NOTE: Use a cross/reverse/null modem cable.

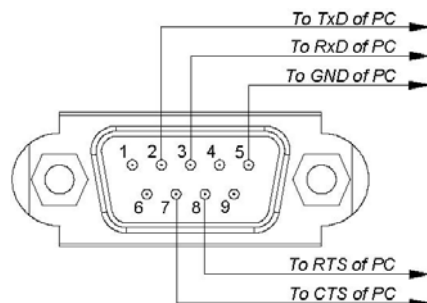

Cable Connection

Communication Protocol:

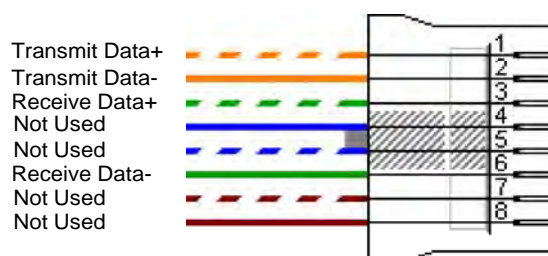

Interface: RS-232C
 Communication: Asynchronous
 Baud Rate: 9600 bps
 Data Length: 8 bits
 Parity: None
 Stop Bit: 1 bit
 Communication Code: Hex

Interface: TCP/IP (Ethernet)
 Communication Layer: Transport Layer (TCP)
 IP Address: 192.168.0.10 (Default)
 Port Number: 7142 (Fixed)

PC Control Connector (D-Sub 9P)

LAN Connector

NOTE:

If so desired, jumper "Request to send" and "Clear to Send" together on both ends of the cable to simplify cable connection. These connections are not required. The only connections required are pins 2 (TxD), 3 (RxD) and 5 (GND)

Browser Control

Information and control can also be available through the HTTP browser control menu.

In order to accomplish this, type: **http://<the Monitor's IP address>/pd_index.html**

Note that the LAN Power needs to be turned on in order for the display to be controlled while the units are off.

All displays are set to the IP address 192.168.0.10 out of the box

Communicating network PC needs to be on the same subnet as display that is being communicated with
