

STI Fluorescent Light Cages

PRODUCT OVERVIEW

The Fluorescent Light Cages offer protection against vandalism and accidental damage. The cages are an excellent way to help assure large fluorescent lights continue to illuminate important areas while avoiding frequent replacement of bulbs because of vandalism, accidental damage or other abuse. They are easy to install with all screws and anchors provided. They are adjustable in length to help accommodate various fluorescent twin-tube lighting fixtures. In addition to their attractive design, these cages feature exceptional durability. They are constructed of heavy-duty, welded steel wire with a tough, corrosion resistant polyester shell.

HOW IT WORKS

A simple 10 fixing point installation makes them easy to mount, and removal is simple for servicing the protected device. They are highly recommended for areas where abuse to fluorescent lighting is severe.

KEY FEATURES

General Information

- Fluorescent light cages offer protection against vandalism and accidental damage.
- Three year guarantee against breakage in normal use.

Design

- These steel cages are designed to protect fluorescent lighting from vandalism and misuse.
- Telescopic in design allowing adjustable sizing.
- Designed so there is no interference with the operation of the protected device.

Construction

- Constructed from plastic coated, heavy-duty galvanised steel rod.

Installation

- A simple 10 fixing point installation can retrofit over existing devices.
- Fast and easy installation.
- Simple removal for servicing of devices.

Options

- Where additional security is required, tamper resistant screws and matching bits are available.
- Twin-tube lighting assemblies can be accommodated.
