

home automation

A smarter system that is easy to sell and easy to repeat, Intuity is the next generation of On-Q home automation. Comprised of high-performing subsystems and third-party components, Intuity offers whole-house control of a home's entertainment, security, comfort and convenience - all managed through elegant app control, on-wall Command Center or from a PC. All of this sophistication from a digital, enclosure-based platform so installing and expanding are easy.
