Adaptability and scalability to grow with your business

Offers security by design and GDPR compliance

Built-in, organization-wide analytics

Simplified subscription model

THE ARCULES DIFFERENCE

One Unified, All-Inclusive Platform delivers enhanced security, streamlined operations, and actionable business intelligence and insights.

| Centralized Monitoring and Management	Enhanced Security, Scalability, and Storage	Business Intelligence and Next Generation Analytics
• View all site locations from web or mobile device, from anywhere, at any time • Remotely schedule software updates and security fixes, reducing the cost and burden on IT staff • Automatic monitoring of device health (cameras, access control & IoT devices, gateways) • Create and manage users, rules, alerts, and alarms so you can operate and respond efficiently	• Easily migrate from on-premise to cloud as your business needs grow and evolve • Continuous video recording even during Internet connection loss • Low latency, speed and accessibility • The Arcules Gateway securely pushes local data to the cloud, encrypted in transit and at rest	• Built with the latest Artificial Intelligence and Machine Learning technologies to deliver analytics across your organization • Utilizing heat maps and people-counting features, gather insights to prevent loss, reduce risks, and improve operations • Enabled for smart technologies, devices, software and more, to deliver increasingly intelligent analytics and insights over time • Arcules business analytics help you turn video data into actionable insights to improve operational efficiency and customer satisfaction

ACCESS CONTROL

The Arcules Integrated Access Control as a Services (ACaaS) offers growing enterprises commercial access control that provides easy remote management, increased security, and minimal maintenance.

Combined with Arcules Video Surveillance as a Service, Arcules Integrated Access Control creates a unified experience that enables you to manage everything from one user-friendly interface, across all locations, from anywhere on any device. Arcules also offers Access Control as a stand-alone service, if desired.

Benefits & Features:

Integrated with Axis A1001 and A1601 Controllers

Review alarms triggered by access control events with video verification

Monitor doors to view live status and states, perform door actions remotely

Manage door modes and unlock schedules

Configure access levels, schedules and holidays

Assign access levels and cards/credentials for users and groups

Scale from one door to many, and one site to many quickly

Unified with Arcules video monitoring to correlate activity and events

THE ARCULES GATEWAY

The Arcules gateway transforms a simple appliance into a unique connector that securely pushes your local data to the cloud – at a cost that's just a fraction of on-premise systems.

Benefits & Features:

Fast set-up and configuration: Easily plug the appliance into your network

Save time, as the latest software is automatically updated

Your data is always secure: The gateway encrypts data that is uploaded to the cloud

Multiple gateway options are available to support different door and channel requirements

A gateway appliance is required for each site to connect devices
