

InfraPower®

IEC / NEMA Rack PDU

1-Phase 230V / 208V / 110V

3-Phase 400V / 208V

AUSTIN
HUGHES

Knowledge is Power.

Fit for Purpose

Rack Power Management, like many areas of Information Technology Infrastructure has evolved in recent years and the options available today enable better usability, energy efficiency and capacity planning.

The rack mounted hardware, application and incoming power would have a bearing on the Intelligent rack mounted PDU technology levels – whether monitored, metered and outlet switched, or outlet switched with outlet metering.

Austin Hughes offers InfraPower cutting-edge rack power solutions for your IT environment, including a comprehensive range of single phase & three phase power distribution units.

Austin Hughes produces affordable, quality InfraPower PDU while providing you with superior service. Whether it is enhancing customer care or implementing new technologies, Austin Hughes promotes innovation, quality and satisfaction in all aspects of business.

RoHS3 COMPLIANCE REACH

InfraPower® intelligent PDUs are supplied with a sophisticated meter with 2.8" color LCD display and touchscreen functionality. The W meter provides not only local metering, but also daisy chain connection ports to connect up to 32 PDUs and 2 optional external sensors.

Cascade port

Up to 32 PDU Level

Sensor port x 2

- Door Mounted PDU Panel
- Temperature & Humidity Sensor
- Temperature Sensor
- Smoke Sensor
- Door Sensor

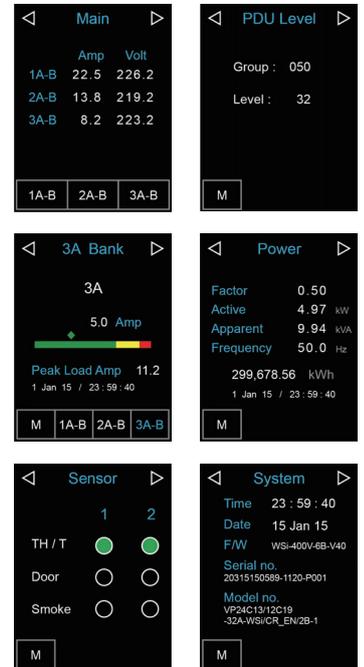

2.8" color LCD

with Touchscreen

Reset button

To re-power the meter if necessary but won't cause any change on settings and memories

Meter Reading & Setting

▶ Billing Grade Meter Accuracy Within +/- 1%

The sharp and highly visible display of color LCD provides local data of:

- > Energy Consumption (kWh)
- > Power (KW)
- > Power Factor
- > Current (Amp)
- > Voltage (V)
- > Temperature & Humidity

The power data has a billing grade meter accuracy to within +/- 1%.

Outlet level measurement available for WSi & Wi models.

Phase balance % available for 3-Phase models.

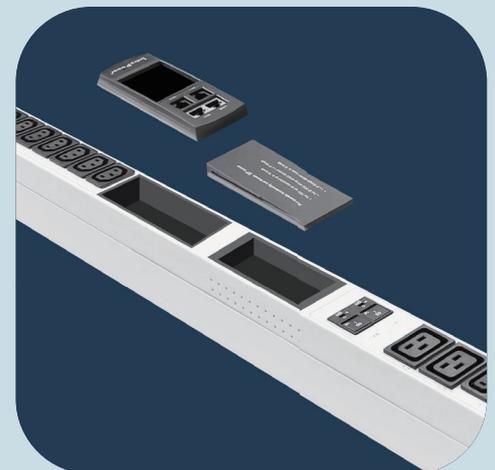

± 1%

▶ Field Replaceable Meter

A field replaceable RMS meter with 2.8" color LCD display with touchscreen functionality. The hot swappable design helps eliminate maintenance downtime by simply replacing a possible defective meter without a service interruption.

▶ Field Replaceable DC Module

Given the mission critical nature of the environment the intelligent rack PDU is designed, built and manufactured to provide extremely high levels of resiliency. In addition to the hot swappable digital local touchscreen display, field replaceable DC power modules are used within the intelligent PDU models to avoid unnecessary downtime.

With any rack mount device or in-cabinet PDU, one of the largest challenges is to integrate the device into the data centre environment without building up additional connectivity, cable run, patch panel, or network related costs.

Patented PDU IP Dongle provides IP remote access to the PDUs by a true network IP address chain. Only one PDU IP Dongle allows access to all PDUs in a single daisy chain – which is a highly efficient application for saving not only the IP remote accessories cost, but also the true IP addresses required on the PDU management.

Hot-Pluggable design facilitates the IP Dongle installation. Simply integrate the PDU IP Dongle to the first PDU, then the entire daisy chain group can be remote over IP. Two RJ-45 connection ports are provided by an IP Dongle. Up to 32 PDU can be cascaded, subject to the dongle model.

The new stylish Dual Lan PDU IP Dongle provides standard 10/100 & Gigabit Ethernet ports. The PDUs in daisy chain can be accessed via two separate networks and hence the PDU connection can be secured by dual LAN network.

For enterprise software management, Dual LAN PDU IP Dongle supports DCIM integration via **SNMP V2 / V3** or **REST API**.

US & Worldwide Patents

IPD-H03-S
Dual LAN IP Dongle - Horizontal
- For 1U iPDU
- Up to 32 levels in daisy chain

IPD-03-S
Dual LAN IP Dongle - Vertical
- For 0U / 2U iPDU
- Up to 32 levels in daisy chain

Dual LAN Network Failover

- > Auto failover to a 2nd Ethernet-connection in the event of network interruption
- > Ensuring 100% iPDU uptime reporting

Connectivity

- > Access your iPDU on two independent networks or VLANs
- > Auto-negotiable 10/100 BaseT Ethernet & 1000 BaseT Gigabit Ethernet ports
- > Redundant network access to the connected iPDUs via IP

USB Wifi Port

- > Optionally connect via a Wifi kit (IPD-WIFI) complying with 802.11 g/n/ac

Remote Management

- > Significantly reduce the number of Ethernet ports used in deployment by cascading a single network connection across multiple iPDUs (up to 32)
- > Simultaneous access via free management software IPM-04, web GUI & SNMP V2 / V3 or REST API
- > Remote level & ID setting for cascaded iPDU's
- > Protocols : HTTP(S); SSH Command Line Interface; Telnet; SMTP; IPv6/IPv4

Enterprise Level IP Authentication

- > Active Directory (AD), Lightweight Directory Access Protocol (LDAPv3 / LDAPS), Remote Access Dial-In User Service (RADIUS) protocol, or local credential database.
- > Strong passwords and granular user/user group permissions.

Alerts / Alarms

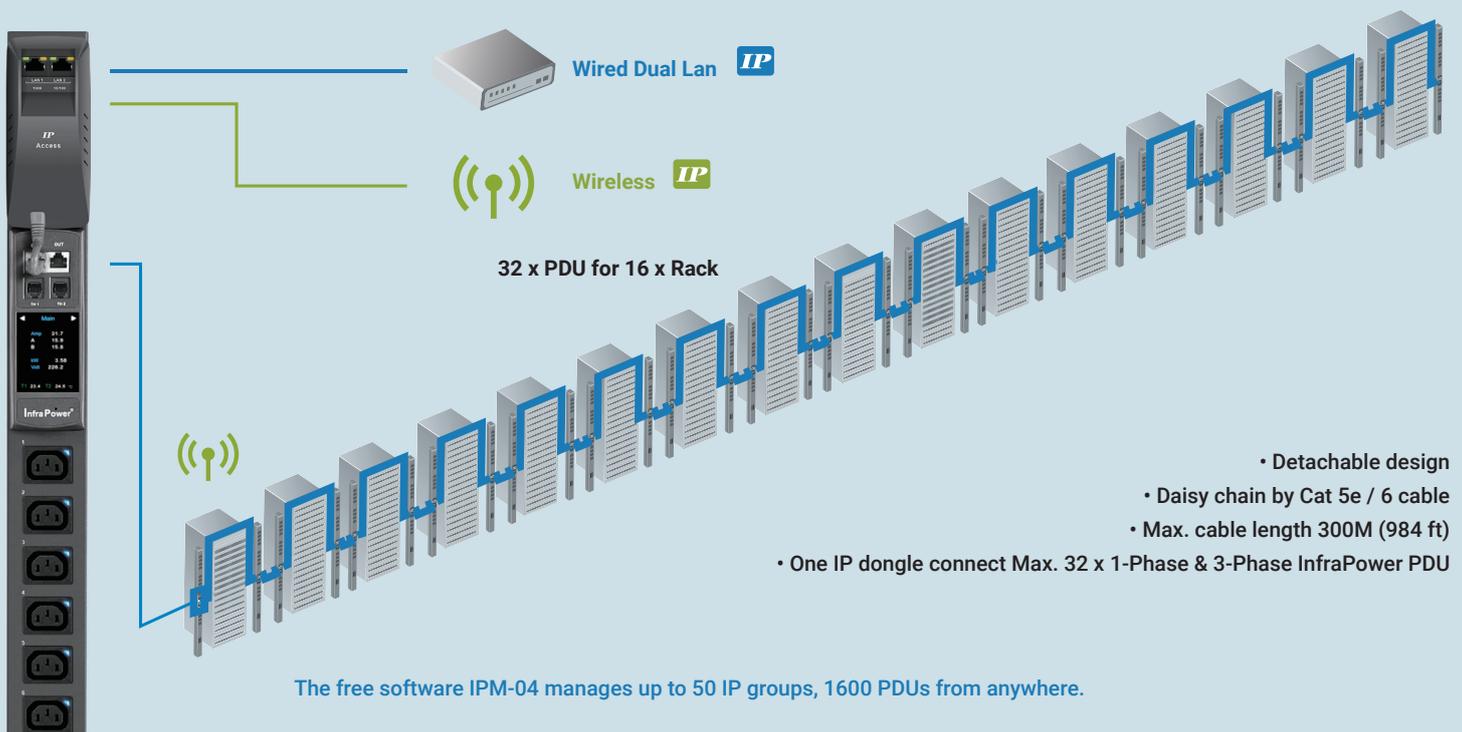

- > Receive alerts via SNMP, email (SMTP), and syslog when predefined thresholds are exceeded for both iPDU and environmental sensor events.
- > Common SNMP MIBs (Management Information Base) across all iPDU families

InfraPower® rack intelligent PDUs provide connection ports for PDU daisy chain. To daisy chain units, each PDU can simply be connected in series to the next by Cat5/6 cables. With the Dual Lan PDU IP Dongle (IPD-03-S), up to 32 daisy chain levels can be achieved. Single & Three Phase PDUs can be inter-cascaded in a single daisy chain.

► High Efficiency PDU Remote Management

Patented PDU IP Dongle provides IP remote access to the PDUs by a true network IP address chain. Only one network IP is required for maximum 32 PDUs in a single daisy chain. The free but comprehensive IPM-04 supports up to 50 IP groups. Hence, max 1600 PDUs can be remotely managed from anywhere.

Remote Management Over IP

PDU remote management helps reducing manpower and hence improving uptime and productivity. It also benefits users with capacity planning and increasing the overall efficiency of the data center. InfraPower intelligent PDU offers 3 kinds of remote management solutions for users' selection.

Free Management Software IPM-04

InfraPower Manager IPM-04 is the free, powerful and user friendly PDU management software provided with W Series PDUs. The Administrator can remotely manage the PDUs and the temperature / humidity sensors via the web browser. The Windows based software consolidates management of max. 1600 single & three phase PDUs via 50 IP dongles. 5 concurrent user access licences are part of the IPM-04 bundle, for achieving the demand of multi-user requirements in data center operations. IPM-04 provides complete PDU monitoring / control and reporting functions for your data center.

Web-based GUI

A web-based GUI is integrated with our intelligent PDU. It is ideal for some users who simply require the power monitoring and input switching over IP.

3rd Party DCIM via SNMP V2/V3 or REST API

Nowadays, many data centers apply the DCIM (Data Center Infrastructure Management) in order to centralize the management for monitoring power, cooling and environmental factors across facilities and IT systems. InfraPower intelligent PDU supports SNMP V2/V3 or REST API integration and hence user can remotely manage the PDU via their DCIM.

▶ Outlet ON/OFF Switching & Latching Relay

Outlet LEDs are built-in for WS & WSi PDU models with outlet switching functionality. Outlet switching is controlled via latching relays. Ensuring an 'always on' operational performance and outlet status returning to a pre-power outage after a planned or unplanned shutdown. Power consumption during normal/ standard operation is low and therefore assists to reduce energy usage of the overall PDU.

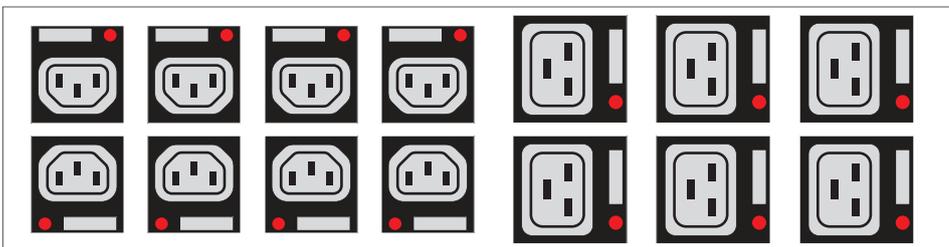

▶ Multiple Outlet Configurations

- > US NEMA + IEC outlet configurations per each individual PDU
- > Flexibility on variety of power connection to different devices

▶ Fused IEC Outlet

- > IEC C13 / C19 individually fused outlets available on request
- > Prevent overload of the active equipment and avoid short circuiting of the entire PDU.

▶ Lockable IEC Outlet

- Lockable IEC outlet PDU models are available to secure plugs and prevent accidental disconnection
- Supports standard or switched outlets
- Compatible with InfraPower lockable IEC power cords for outlet locking features

▶ Colored PDU Power Feed Differentiation

The use of colors at rack PDU and cord levels has become a huge market trend with most organizations favouring different colors in the rack for the A & B primary and redundant feeds into equipment. Colored PDU chassis & power cords are available to achieve such power source visualization & cable management requirement.

▶ Colored PDU Chassis

Colored PDU chassis allow easy identification of power paths and simplifies management of power sources.

Standard color : Black

Optional color : White, Red, Blue, Green, Orange, Yellow, Purple

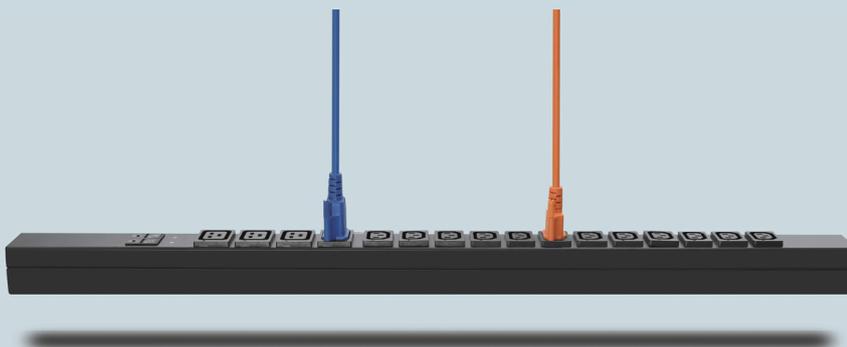

▶ Colored Lockable IEC Power Cord

- Connect to InfraPower lockable IEC outlets to secure plugs and prevent accidental disconnection
- Selection: Black / Grey / Red / Blue / Orange / Green

C13 - C14 (0.75 mm²):
0.5M / 1M / 2M

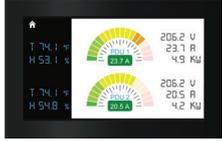

C19 - C20 (1.5 mm²):
1M / 2M

W series PDU meter comes with a pair of connection ports for sensors & peripherals. It provides a simple and affordable solution for customers to monitoring the environmental status of racks. Dual LAN PDU dongle supports optional WiFi kit with standards 802.11 g/n/ac. It meet the wireless network requirements and reduce capital expenditure cost as well as Ethernet installation & maintenance.

IP-ED-01

4.3" Door Mount Display Panel

- Connect to iPDU meter TH2 port
- 1 smart display panel support 2 iPDUs (1-Phase & 3-Phase)
- Displays power, temp., humid., smoke or door status
- Alarm & log
- Viewable while doors in closed position
- Resistive touchscreen

- Resolution 480 x 272
- Horizontal or vertical display option
- Easily affix to doors by magnetic rear
- No cut-out / damage required to doors
- Upgrade racks to smart and stylish look
- Plug & Play

IPD-WIFI

WiFi Kit

- Connect to IPD-03-S IP Dongle
- 802.11 g/n/ac WiFi
- Low-profile design wireless athena
- Magnetic base design for tool-less affix
- 1M cord w/ USB port

IG-TH01-2M/4M

IG-T01-2M/4M

Temperature & Humidity Sensor Temperature Sensor

- Plug & play
- External sensor with 2M or 4M cord
- Low profile design with magnetic base for easy affixing to the rack

IP-S01-1M/3M

Smoke Sensor

- Smoke Sensor w/ 1M or 3M cord
- When smoke alarm triggers, sensor red LED lights on with beep sound continuously

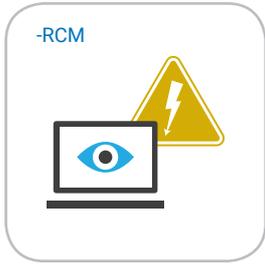

IP-DSW-2M/4M

Door Sensor

- Mechanical door sensor w/ 2M or 4M cord
- Cost efficient integration into rack

The operating parameters for PDUs should take into account temperature rise within the rack due to the exhaust air from server/ network equipment. InfraPower PDU supports operation temperature -5 to 60°C for reliable operation in high density rackmount equipment environment. A range of safety devices are offered not only to protect the equipment from overcurrent but also the users from harm when working on racks.

Residual Current Monitor

- Residual current monitoring
- Alerts users to current leaking from IT devices
- Reduces the danger for both the user and IT system

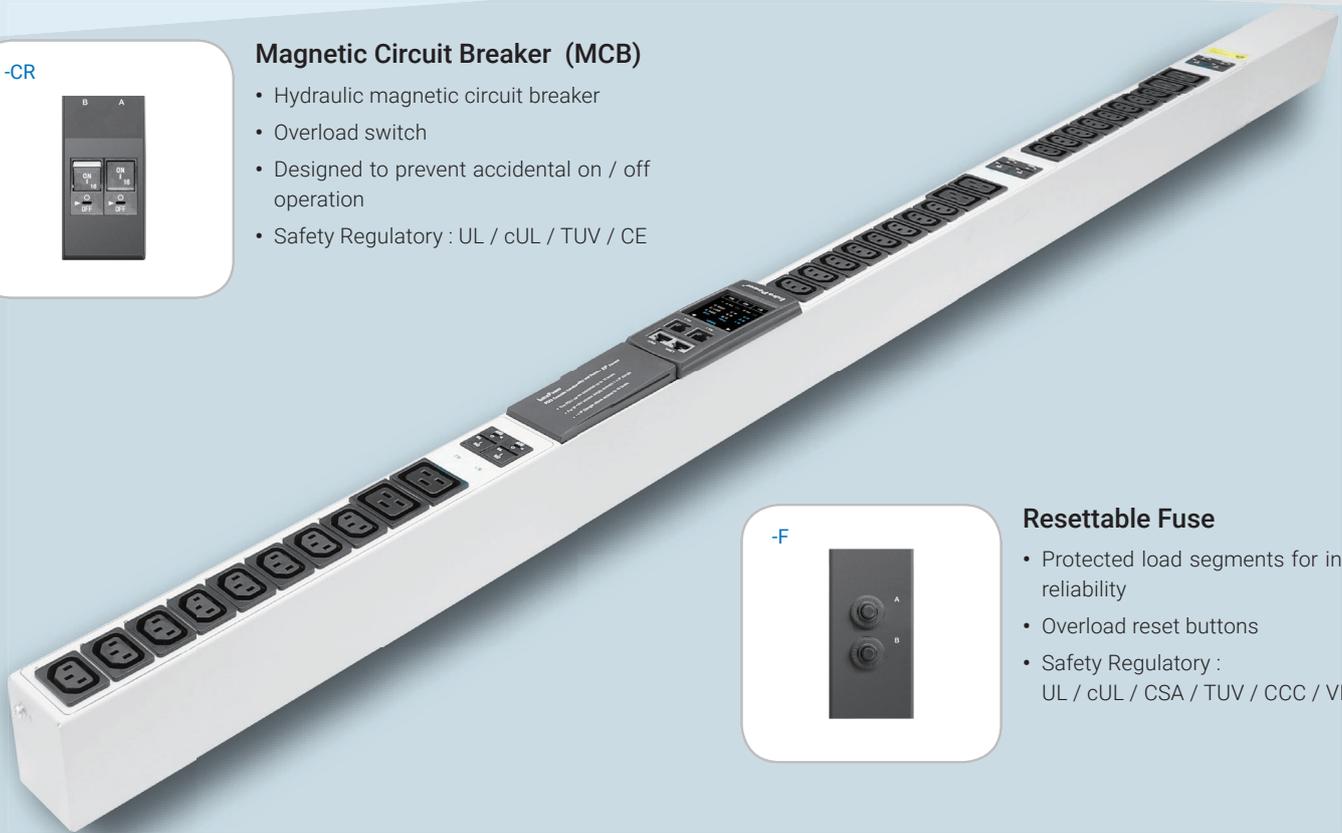

Earth-leakage Circuit Breaker

- Earth-leakage circuit breaker
- Safety component with high Earth impedance to prevent shock
- Interrupting the circuit if a dangerous voltage is detected

Magnetic Circuit Breaker (MCB)

- Hydraulic magnetic circuit breaker
- Overload switch
- Designed to prevent accidental on / off operation
- Safety Regulatory : UL / cUL / TUV / CE

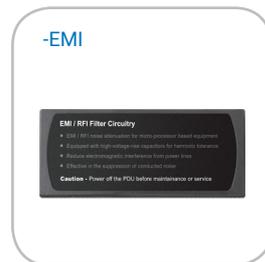

Resettable Fuse

- Protected load segments for increased reliability
- Overload reset buttons
- Safety Regulatory : UL / cUL / CSA / TUV / CCC / VDE

Surge Protector

- Enhances the device protection
- Grounds unwanted voltages above the safe threshold
- Surge suppression: 2,700 Joules
- Max surge current: 75,000 Amps
- Max voltage: 6,000 Volts
- Response Time: 1 nanosecond

EMI Filter

- Maintains power stability
- Suppresses conducted interference on a signal/power line
- Line frequency : 50 / 60 Hz
- Attenuation : Up to 50 dB

▶ Vertical 0U - Slim Design

For efficient mounting to rack, InfraPower vertical IEC / NEMA PDU steel chassis is designed in 54mm (2.1 inch) slim profile.

For some global brand of IT racks, such slim casing design allows dual PDU mounting to one side in the rack for one side power cabling orientation.

▶ Bottom/ Top Power Feed

When selecting a rack PDU, we always need to consider the power input feed route through the rack enclosure.

In some data centers, the power feed is positioned at the top, hence Top Feed PDU is preferred in order to facilitate the power cabling.

Austin Hughes designs the 0U PDU chassis with power feed position flexibility. Customer can select bottom feed or top feed when ordering. By Built-To-Order, Austin Hughes simply assemble the PDU according to your request.

▶ Vertical 0U or Horizontal 1U/ 2U

Typical PDUs can be mounted either vertically (0U) or horizontally (1U-2U) inside the rack. Most PDU manufacturers focus on 0U PDUs, whilst the choices are limited for 1U / 2U rackmount PDUs. Austin Hughes offers a wide range of InfraPower rackmount PDU in order to meet the market needs.

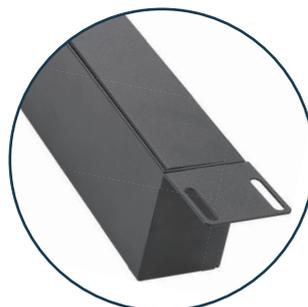

▶ Vertical Button Mounting Kit

Quick and tool-less integration. Designed for global branded racks with key hole type mounting holes.

▶ Vertical Bracket Mounting Kit

Universal mounting kit supports all IT rack models.

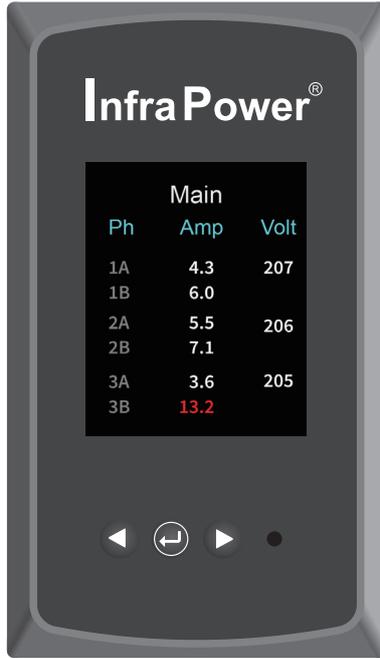

▶ Horizontal Rackmount Kit

Design for 19" Rackmount.

Dual Feed Rack PDUs

- > Two PDUs in one single chassis
- > Simplify dual PDU setup & save the valuable rack spaces
- > Colored PDU layout distinguishes between primary & secondary power feeds
- > Achieve one side orientation for power cabling
- > Facilitate rack cabling and management efficiency

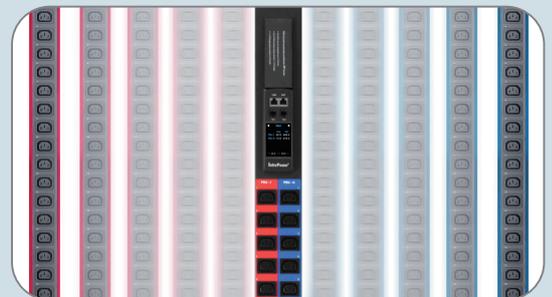

Two PDU's in One Chassis

Traditionally, data center racks are equipped with two PDUs positioned in the rear left and right side respectively. InfraPower dual feed PDU is designed to house two PDUs in a single chassis which only requires one side installation. Hence, this facilitates PDU setup and saves valuable rack space. Red + Blue colored PDU layout enables differentiation of the primary and redundant (A&B) power feeds.

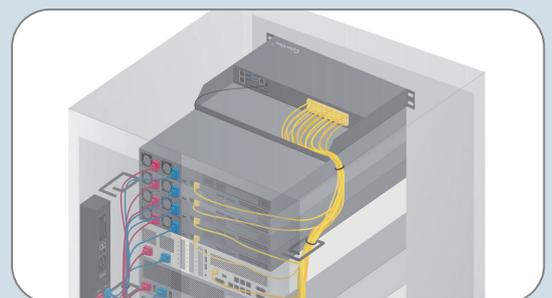

Save Network IP Cost

For intelligent PDU, Austin Hughes develops 1 Meter 2 PDUs solution. The sophisticated LCD touchscreen meter is integrated in a single chassis but for both primary and secondary PDUs. The meter not only allows local monitoring for 2 PDUs, but also supports up to 32 cascade levels. By the patent IP dongle and dual PDU design, only one IP is required to access up to 64 PDUs in a single cascade group.

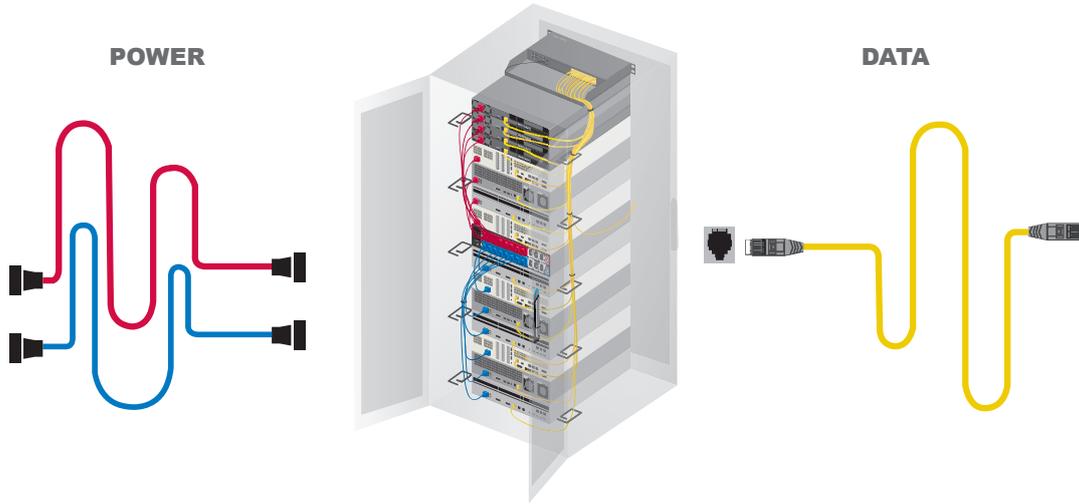

Facilitate Cable Management

Separating power and data cables inside a rack minimizes erratic data transfer as well as EMI and assists in distinguishing between power and data cabling. By InfraPower Dual Feed PDU, power & data cable separation is easily achieved. In addition, space-saving design and Red + Blue distinguishable layout contribute to a well-organized rack cabling.

One Side Orientation for Power Cabling

Power and data cables should be kept apart in order to avoid interference. It is a typical practice to isolate power cabling to one side of the rack, whether it is for primary or secondary power connection. InfraPower Dual Feed PDU series offers an efficient, convenient & space saving solution - Primary & Secondary PDUs are integrated to one unit with dual power feed.

Example 1:

Part Code : VP18C13/6C19-20A-WSI/CR_L2120/2B-1

Model : WSi iPDU with Circuit Monitoring + Outlet Monitoring + Outlet Switching

Configuration : Vertical, Three Phase, C13 x 18 + C19 x 6, 20A, MCB, NEMA L21-20P Inlet, 2M (6 FT) Cordset, Bottom Feed, Black Chassis

Example 2:

Part Code : DV40C13/8C19-32A-W/CR_OE/3T-1

Model : W iPDU with Circuit Monitoring

Configuration : Dual Feed, Vertical, Single Phase, (C13x20 + C19x4) x 2, 32A, MCB, Open-end, 3M (10 FT) Cordset, Top Feed, Standard Dual Feed PDU Chassis Colors (Red Layout for PDU-I + Blue Layout for PDU-II)

Example 3:

Part Code : H12US-30A-MD/CR_L530/3B-2

Model : MD Metered PDU

Configuration : Horizontal Rackmount, Single Phase, US NEMA x 12, 32A, MCB, L5-30 Inlet, 3M (10 FT) Cordset, White Chassis

Founded in 1995, Austin Hughes is a design and manufacturing group that offers a broad range of solutions based around 19 inch rack mount technology: the UltraRack IT server rack series, InfraRack intelligent rack solutions, InfraPower intelligent remote management power solutions, InfraCool intelligent remote cooling systems, InfraGuard environmental sensors and peripherals, InfraSolution remote locking and access control & CyberView LCD KVM switches. We also offer industrial & commercial IT products: UltraView professional displays & MiniBoot web power reboot.

Austin Hughes has ISO14001 and ISO9001 approved design, manufacturing, assembly and test facilities. We support a worldwide customer base through our global locations in the Americas, EMEA, APAC and ASEAN and through an extensive authorized channel partner network.
