

## Snap caps for WiFi access points for indoor network

Snap Cap Aruba AP cover

Snap Cap Cisco AP cover

Liberty's Snap cap plastic covers are designed for customers to address aesthetic design concerns in the environment where the access point will be deployed.

Snap caps are plastic cover forms for each popular access point. Made of ABS plastic, these covers are available in standard colors – typically black or white – but also can be molded in other colors to match customer aesthetic requirements. Each cover snaps onto the AP at each corner to secure in place. There are no screws and no damage is done to the access point.

Liberty Part	Compatible Access Point
LSCBC9120	Cisco 9120 AXI
LSCBC9130	Cisco 9130 AXE
LSCBA500	LSCBA500

Additional designs available upon request.

Snap cap covers can be used in conjunction with wall mounts.
